🐙 <https://github.com/vickygit702>

📍 Dindigul , Tamil Nadu

Profile Summary

- Detail-oriented and solutions-driven MERN Full Stack Developer (Fresher) with hands-on experience in designing, developing, and maintaining scalable web applications through academic projects and self-learning.
- Strong foundational knowledge in software development life cycle (SDLC), object-oriented programming (OOP), and problem-solving.

Relevant Coursework

- Redux - State Management
- Cloud Basics (AWS)
- JWT Authentication
- Containerization (Docker)
- Building RESTful APIs
- Version Control

Personal Projects

Social Media Web Application | MERN |

- Users to create posts, like, and comment in real-time.
- JWT-based authentication and authorization for secure user access.

Medi-Care System | React | <https://medi-care-project.vercel.app>

- Featuring authentication (Supabase), dynamic medication lists (CRUD operations), and a calendar view to track medication adherence with visual markers.

Academic Project

AI Powered Domestic Services Web Application | MERN | <https://domestic-services-frontend.onrender.com/>

- Led a MERN stack project integrating AI-based allocations for service providers (finds nearest-one). Implemented user auth, real-time bookings, and payment processing.
